

Network diagram showing interactions between various cell types and biological processes. Nodes are colored by category: B.cells (red), T.reg (grey), T.Naive-ANK3 (light green), T.Naive (light green), T.cyto (yellow), Schwann.cells (dark green), Plasma.cells (dark green), Syriabasal (dark green), Melanocytes (dark green), OHS (dark green), and others. Edges represent interactions, with some highlighted in yellow and others in pink.
